

KONICA MINOLTA

THE FUTURE OF WORK

workplacehub
IT on your terms

IMAGINE TECHNOLOGY BUILT AROUND **YOU**

Enabling you to work as you want.
Learning, adapting and working
for you – on your terms.

Free. Empowered. Connected.

Welcome to the future of work.

WORKPLACES ARE **CHANGING**

They have traditionally been physical places where people convene and access the information they need. They've been defined by square footage and units of labour.

Technology is changing this.

It is allowing information to flow between people, spaces and devices, creating intelligent environments where people work smarter. Artificial Intelligence and the Internet of Things will empower us further with resources that will mean we define where we work, how we collaborate and what we create. We will perform tasks more efficiently and effectively. We will become more productive and make businesses more competitive.

UNLOCK YOUR FUTURE

The smart, intelligent workplace starts by simplifying your IT.

All your different systems must first talk to each other in a unified and robust IT infrastructure. This will enable your technology to connect your people, spaces and devices together seamlessly and intuitively.

Only then can you move to a truly digital, IoT enabled workplace. Intelligent technologies can be added. Machine learning will become possible and grow. Your business will be future proofed, and your people will collaborate and work in new and dynamic ways.

FREE TO DO **MORE**

Workplace Hub is the start of the journey.

For the very first time, all your different technologies are brought together and connected so they work for you. It seamlessly configures systems, devices and software into a single layer and gives them a common language.

It removes the burdens of repetitive IT tasks and frees your business to think how you can use technology as a real competitive advantage.

EMPOWER YOUR BUSINESS

Putting intelligence at the heart of your
business, helping you work smarter.

Workplace Hub is an AI ready platform that ensures your business grows with technology. It will have the power to manage the volume and complexity of your data, seamlessly, securely and with ease.

It will learn how you gather information, how you analyse it, how you make decisions and how you perform actions. It will predict your needs, creating and organising information and connecting you with other individuals to help you work more effectively.

Workplace Hub gives you a flexible and scalable IT infrastructure that grows with your business. Over time, it will become your cognitive centre, giving you a whole new level of capability.

It answers your IT problems of today with intelligent solutions for tomorrow.

ONE COLLABORATIVE SOLUTION

At Konica Minolta, we've always been at the heart of the workplace, creating value for customers.

Now is no different. We are combining our technology, know-how and unique vantage point to transform how people, spaces and devices connect. And we are collaborating with some of the world's leading technology businesses to make this a reality.

The intelligent intuitive workplace of the future is only a step away.
